PROFILE

Results-driven Software Developer and multi-award-winning mobile developer with proven experience building full-stack web, desktop, and mobile applications. Recognized as a CodeFest Local and Cluster Champion and National Finalist in mobile app hackathons. Proficient in React Vite, Java, Android Studio, and database management, with a strong foundation in enterprise systems and collaborative software engineering.

TECHNICAL SKILLS

AI & Large Language Models:

Generative AI (GenAI), Foundation Models, Large Language Models (LLMs), Multimodal AI, Fine-Tuning, Prompt Engineering, Semantic Routing, n8n, Microsoft Copilot Studio, Agent 365, Bedrock Agentcore

Backend Development:

Java, Spring Boot, Node.js, Python, FastAPI, RESTful APIs, End-to-End (n2n) Architecture

Frontend, Mobile & UI:

React Vite, Next.js, AJAX, SASS / SCSS, Tailwind CSS, JavaScript (ES6+), TypeScript, HTML5/CSS3, Android Studio, Java Swing.

Data Modeling & Architecture:

SQL, Database Management, Data Warehousing, Data Mapping, Data Models.

DevOps & Tools:

Git, GitHub, CI/CD Pipelines, Docker, Enterprise Systems (SAP S/4HANA), Agile/Scrum Methodologies, System Logic Optimization.

EDUCATION

STI College Fairview 2022 - 2026 (Present)

Bachelor of Science and Information Technology

Bethel Christian School 2020 -2022

Humanities and Social Sciences

WORK EXPERIENCE

STI Fairview. | 2024

Student Assistantship - Management Information System

3 AM Digital Media. | 2026

Software Developer Intern | NLP Business Development Services

PROGRAMMING SKILLS

Java:

Spring Boot, Spring Security, Spring Data JPA, Hibernate, Maven, Gradle, Java Swing.

Web Languages:

JavaScript (ES6+), TypeScript, React, Next.js, HTML5, CSS3, SASS / SCSS, AJAX, Tailwind CSS.

Mobile Development:

Android Studio, Kotlin, Java (Mobile), XML, Gradle, Flutter.

.NET & C#:

ASP.NET Core, Entity Framework, Object-Oriented Programming (OOP), System Integration.

PHP:

Laravel framework, Server-side scripting, RESTful API Construction, Composer.

PYTHON:

Automation scripts, Data Parsing, Flask.

PROJECTS

StarWashPH Laundry Management System | Thesis Project

Architected a full-stack, end-to-end enterprise solution utilizing a robust Spring Boot Java backend coupled with MongoDB for efficient, scalable data management. Developed a highly responsive and modern user interface using React Vite and Tailwind CSS to streamline multi-site laundry logistics, customer order tracking, and real-time operations, ultimately reducing manual administrative friction by 40%.

OptiRoute: AI Ticket Priority & Routing System

Engineered an intelligent, agentic end-to-end routing pipeline that utilizes Claude 3.5 and Gemini 1.5 to autonomously triage, analyze, and classify high-volume support tickets. By leveraging semantic routing and real-time sentiment analysis to instantly identify urgent client escalations and route them to specialized engineering teams, the system effectively eliminated manual sorting bottlenecks and cut down overall triage time by 85%.

SynapseStream – AI-Driven Multi-Genre Media Ecosystem

Designed a next-generation, multi-genre media discovery platform centered around a generative AI recommendation engine powered by Gemini and custom Retrieval-Augmented Generation logic. Built with a React Vite and Node.js framework, the platform features an end-to-end media curation pipeline that uses advanced LLM prompt engineering to capture sub-textual user preferences, delivering instant interface updates and personalized content summaries that boosted cross-genre media discovery by 30%.

CERTIFICATIONS

Codefest National Entrant 2024 - 2025

Advanced to the national stage to compete among the country's top developers, executing a complex mobile software solution during a grueling, continuous 32-hour development sprint without any AI assistance.

Codefest Cluster Champion 2024 - 2025

Secured consecutive regional cluster championships, successfully designing, coding, and pitching an end-to-end mobile solution under a strict 6-hour time constraint against top local teams.

Codefest Local Champion 2024 - 2025

Won back-to-back local championship titles by engineering a fully functional mobile application from scratch within an intensive, high-pressure 6-hour development limit.
